PROFESSIONAL SUMMARY

Results-driven Digital Learning Engineer and Instructional Designer passionate about transforming education through technology. I combine strong pedagogical expertise with advanced technical skills to design engaging, learner-centered digital experiences. Specialized in LMS/Moodle administration, SCORM and H5P content development, curriculum design, and full-cycle e-learning production. My approach is grounded in UX Learning principles, pedagogical engineering, and EdTech innovation — enabling organizations to modernize their training programs and maximize learner engagement.

PROFESSIONAL EXPERIENCE

Digital Learning Engineer & Instructional Designer | HEP March 2026 – Present | Final Year Internship (PFE)

Project: Deployment, hosting & customization of Moodle LMS — Full digitalization of a 100% online Client-Side Web Development training program for Professional Bachelor's students in Computer Science, delivered in both synchronous and asynchronous modes.

- Deploying and hosting the Moodle platform: server installation, technical configuration, security hardening, and full production environment setup
- Advanced Moodle customization: visual theme design, learner interface optimization, course space structuring, and activity settings configuration
- Designing and fully digitalizing the Client-Side Web Development curriculum (HTML5, CSS3, JavaScript, Bootstrap) as a 100% online program
- Structuring the training program across two complementary delivery modes: synchronous sessions (live virtual classes, webinars) and asynchronous self-paced learning (on-demand content)
- Integrating an intelligent pedagogical chatbot in asynchronous mode to support, guide, and answer learner questions outside of live sessions
- Producing multimedia learning content using Articulate Storyline, Canva, Adobe Premiere Pro, OBS Studio, Camtasia, and ElevenLabs (AI voice synthesis)
- Creating interactive resources and formative assessments with Logiquiz, and packaging SCORM modules for accurate learner progress tracking on Moodle
- Scripting instructional sequences by aligning learning objectives, activities, and assessments with the target competencies of the Professional Bachelor's program
- Optimizing the learner experience (UX Learning) and providing ongoing support throughout the digital training journey

Educational Robotics & STEM Trainer | ROFEO 2024 – Present

- Delivering hands-on robotics training sessions for learners of various levels using active and project-based learning methodologies
- Designing and implementing STEM educational modules with LEGO Spike and Arduino to develop 21st-century skills
- Providing pedagogical mentoring and technical coaching to support learners in completing innovative educational projects
- Simplifying complex technological concepts through differentiated, interactive instructional approaches
- Developing digital learning materials and project-based learning resources to enrich the educational experience

Adjunct Instructor – Computing & Digital Technologies | HEP 2026 – Present

- Delivering theoretical and practical training sessions for Bachelor's students in: Algorithms, Java, C, HTML5/CSS3, JavaScript, Bootstrap, and Databases
- Designing digital learning materials, lab exercises (TP), and instructional resources tailored to student needs
- Implementing interactive teaching approaches and formative assessments to monitor learner progress
- Providing individualized academic coaching and mentoring to support students in technical projects
- Leveraging educational technology tools to energize learning and build digital competencies

Instructional Designer – Robotics Modules | ROFEO July – September 2025 | Internship

- ♣ Designing and producing comprehensive educational robotics modules for middle school students
- ♣ Structuring learning pathways according to competency-based learning and instructional engineering principles

Web Developer | FST Settat Apr 2024 – Jun 2024 | Final Year Internship

- ♣ Designed and developed a modern e-commerce platform dedicated to product showcasing and online sales
- ♣ Built responsive and user-friendly interfaces optimized for desktop, tablet, and mobile devices
- ♣ Developed dynamic product management functionalities including product listing, categories, and detailed product pages
- ♣ Implemented an optimized user experience with smooth navigation and interactive web interfaces
- ♣ Integrated front-end and back-end technologies to ensure platform performance, reliability, and scalability
- ♣ Designed and managed the database structure for handling products, users, and online operations
- ♣ Contributed to enhancing customer experience through a modern, ergonomic, and intuitive interface

EDUCATION

Master's Degree – Training Engineering & Digital Learning

École Supérieure d'Éducation et de Formation (ESEFB), Berrechid, Morocco 2024 – 2026

Bachelor's Degree – Science & Technology, Computer Engineering

Faculty of Sciences and Technology, Settat, Morocco 2023 – 2024

DEUST – Mathematics, Computer Science & Physics (MIP)

Faculty of Sciences and Technology, Settat, Morocco 2021 – 2023

High School Diploma (Baccalaureate) – Experimental Sciences, Physics

Lycée Oulad Hriz, Berrechid, Morocco 2020 – 2021

ACADEMIC PROJECTS

Research Study: Special Vocational Training Contracts (CSF) in Morocco

ESEFB, Berrechid Feb. – Jun. 2025

- ♣ Analyzed professional continuing education frameworks and funding mechanisms in Morocco

Online Recruitment Web Platform

FST Settat Feb. – Apr. 2024

- ♣ Designed and developed a web platform streamlining the recruitment process for both employers and candidates

SKILLS

Digital Learning & Instructional Design

- ♣ Instructional Design & Curriculum Scripting
- ♣ Learning Experience Design (LXD) & UX Learning
- ♣ Blended Learning & Hybrid Learning
- ♣ Formative & Summative Assessment Design
- ♣ Training Needs Analysis
- ♣ Digital Learning Pathway Design

LMS & E-learning Authoring Tools

- ♣ Moodle LMS – Administration, configuration & customization
- ♣ H5P – Interactive content creation
- ♣ Articulate Storyline – Rapid e-learning authoring
- ♣ SCORM / xAPI – E-learning standards & tracking
- ♣ Canva, Camtasia, OBS – Multimedia content production
- ♣ Quizizz, Kahoot – Interactive assessment tools

Educational Technology & STEM

- ♣ Arduino, LEGO Spike – Educational robotics
- ♣ Tinkercad – Electronic simulation
- ♣ STEM Education & Project-Based Learning

Technical Skills (as pedagogical support tools)

- ♣ HTML5, CSS3, JavaScript, Bootstrap – Web development
- ♣ PHP, MySQL – Databases
- ♣ Java, C, Python – Programming

Productivity & Collaboration

- ♣ Microsoft Office 365 (Word, Excel, PowerPoint)
- ♣ Google Workspace (Docs, Slides, Forms)

LANGUAGES

Arabic: Native | **French:** Advanced (C1) | **English:** Intermediate (B1)
